

Appendixes:

Appendix A: Questionnaire Kaingin

University van Hall larenstein, The Netherlands—Centre For Sustainability, The Philippines

Questionnaire Land Grabbing:

Name Interviewer: _____

Name Respondent: _____

Gender: _____

Age: _____

Occupation: _____

Profession: _____

No. of years in the Area: _____

Monthly income:

0-1000 ☐

1000-3000 ☐

3000-5000 ☐

>5000 ☐

Interview Reason:

We are researchers who work for the NGO 'Centre for Sustainability' to help mapping the forest areas, agricultural areas and residential places in the Municipality of Puerto Princesa, in particular the Barangays; Cabayugan and Tagabinet. We are very interested in your view on the land cover change since the last decade (2002-2012), what kind of problems you encounter and what solutions you think would be good to solve the problem.

Down below is a list of pre-arranged questions which we would like to ask you to answer the subject that we are doing research on. Your answers will be appreciated and would be very helpful to gain a better insight in the Kaingin situation in Cabayugan and Tagabinet. The information which is collected during the interview will be dealt confidential and is only used for this research.

1) What is the main reason that you are applying forest conversion?

____ lack of income

____ I want to have more land

____ I have no land

____ swidden cultivation/slash and burn

____ annual yield is too low

____ other

2) How do you converse the forest?

____ swidden cultivation

____ slash and burn/permanent settlement

____ cut all the trees

____ other

3) About how much land have you converted?

____ 0-1 hectare

____ 10-20 hectares

____ 1-5 hectares

____ 20-50 hectares

____ 5-10 hectares

____ > 50 hectares

4) Where do you use the land for after forest conversion?

____ agriculture

____ residential area/farmhouse

____ farm animals

____ establishment of a store for tourism

____ other

5) In the case of agriculture, what do you plant?

<input type="checkbox"/> rice	<input type="checkbox"/> banana
<input type="checkbox"/> mais	<input type="checkbox"/> coconut
<input type="checkbox"/> other	

6) In the case of farm animals, which animals do you have?

<input type="checkbox"/> chickens	<input type="checkbox"/> dugs
<input type="checkbox"/> water buffels	<input type="checkbox"/> goats
<input type="checkbox"/> other	

6) In the case of tourism, what kind of shop do you want to build?

<input type="checkbox"/> restaurant	<input type="checkbox"/> hotel/pension
<input type="checkbox"/> fast food	<input type="checkbox"/> bar
<input type="checkbox"/> other	

8) What effects do you notice in your local environment because of Land Grabbing?

<input type="checkbox"/> loss of forests/vegetation	<input type="checkbox"/> loss of water
<input type="checkbox"/> There is a loss of wildlife	<input type="checkbox"/> increase in (soil) erosion
<input type="checkbox"/> decrease in water quality	<input type="checkbox"/> increase in competition for natural resources
<input type="checkbox"/> other	

10) What kind of solutions do you use to resolve the negative effects?

<input type="checkbox"/> Legitimate Ownership	<input type="checkbox"/> Higher yield with better technology
<input type="checkbox"/> Alternative job (tourist guide)	<input type="checkbox"/> Other
<input type="checkbox"/> Alternative Agricultural use (Agroforestry)	

11) Did you have any problems with the government or other people in relation to Kaingin or forest conversion?

12) What type of ownership do you have on your land?

13) How many additional hectares of land would you like in the future?

14) What kind of crops would you like to plant on this additional land?

Appendix B: Questionnaire Charcoal Production

University van Hall larenstein, The Netherlands—Centre For Sustainability, The Philippines

Questionnaire Charcoal-Maker:

Name Interviewer: _____

Name Respondent: _____

Gender: _____

Age: _____

Occupation: _____

Profession: _____

No. of years in the Area: _____

Monthly income:

0-1000 ☐

1000-3000 ☐

3000-5000 ☐

>5000 ☐

Research Reason:

We are researchers who work for the NGO 'Centre for Sustainability' to identifying how much charcoal is collected in the Municipality of Puerto Princesa, in particular the Baranguays; Cabayugan and Tagabinet. We are very interested in your view on the Charcoal Production since the last decade (2002-2012), what kind of problems you encounter and what solutions you think would be good to solve the problem.

Down below is a list of pre-arranged questions which we would like to ask you to answer the subject that we are doing research on. Your answers will be appreciated and would be very helpful to gain a better insight in the Charcoal Production situation in Cabayugan and Tagabinet. The information which is collected during the interview will be dealt confidential and is only used for this research.

1) What is the main reason why you produce charcoal?

2) Which are the best tree species for charcoal-making, why are they good?

Give a list of 5-10 tree species which are commonly used

3) What part of a tree is used for charcoal making?

____ Whole tree

____ Branches

____ Stem

____ Other

____ Roots

4) How big are the trees that you use for charcoal-making?

____ 0-10 cm

____ 30-40 cm

____ 10-20 cm

____ >40 cm

5) How often do you produce charcoal?

____ 1x a week

____ 3x a week

____ 2x a week

____ >4 a week

____ other

6) How many trees do you need for 1 burning or one sack of charcoal?

7) What time of year do you produce charcoal?

8) How far do you need to travel to gather enough firewood for a burning?

____ 0-500 meter

____ 1000-2000 meter

____ 500-1000 meter

____ >2000 meter

other

Additional Questions Charcoal-Buying:**Firewood use:**

- 1) Which species of firewood do you use?
- 2) Where do you get the firewood from?
- 3) What part of a tree do you use for firewood?
- 4) How many parts of a tree do you use per week?

Charcoal-Buying Sari Sari Store:

- 1) Where do you buy the charcoal?
- 2) How much do you pay for 1 sack?
- 3) How many sacks do you sell?
- 4) How much do you ask for 1 sack?
- 5) Where do you sell the sacks?
- 6) To whom do you sell the sacks?
- 7) What is your additional monthly income for selling charcoal?

Appendix C: Questionnaire Charcoal Consumption

University van Hall larenstein, The Netherlands—Centre For Sustainability, The Philippines

Questionnaire Charcoal-Buyer:

Name Interviewer: _____

Name Respondent: _____

Gender: _____

Age: _____

Occupation: _____

Profession: _____

No. of years in the Area: _____

Monthly income:

0-1000 ☐

1000-3000 ☐

3000-5000 ☐

>5000 ☐

Research Reason:

We are researchers who work for the NGO 'Centre for Sustainability' to help identify how much charcoal is collected in the Municipality of Puerto Princesa, in particular the Baranguays; Cabayugan and Tagabine. We are very interested in your view on Charcoal Consumption since the last decade (2002-2012), what kind of problems you encounter and what solutions you think would be good to solve the problem.

Down below is a list of pre-arranged questions which we would like to ask you to answer the subject that we are doing research on. Your answers will be appreciated and would be very helpful to gain a better insight in the Charcoal Consumption situation in Cabayugan and Tagabine. The information which is collected during the interview will be dealt confidential and is only used for this research.

1) Do you use charcoal?

2) Why do you use charcoal?

_____ Affordable _____ only fuel source

_____ Convenient _____ other

3) Which species are used to make charcoal?

Mention the list of 5-10 species

4) How frequently do you buy charcoal?

_____ 1x a week _____ >4x a week

_____ 2x a week _____ other

_____ 3x a week

5) How heavy is one sack of charcoal?

6) How much do you pay for one bag of charcoal?

_____ 0-40 Pesos _____ 60-80 Pesos

_____ 40-60 Pesos _____ <80 Pesos

7) Where do you buy the charcoal?

_____ Straight from the burning site _____ At the local market

_____ At the local Sari-Sari Store _____ Other, Please specify

8) How much bags of charcoal do you consume per week?

___ 0-5 bags

___ 10-15 bags

___ 5-10 bags

___ >20 bags

9) Can you buy charcoal year-round?

10) Is there more or less charcoal supply during the rainy season in comparison with the dry season?

11) What effects do you notice in your local environment because of charcoal-making?

___ loss of forests/vegetation

___ loss of water

___ It is harder to find charcoal species

___ decrease in water quality

___ There is a loss of Wildlife

___ increase in (soil) erosion

___ increase in competition for natural resources

12) What kind of solutions would you be interested in to solve the negative effects?

___ alternative fuel (Biogas, Kerosene)

___ alternative energy sources (hydropower)

___ more efficient stoves

___ other

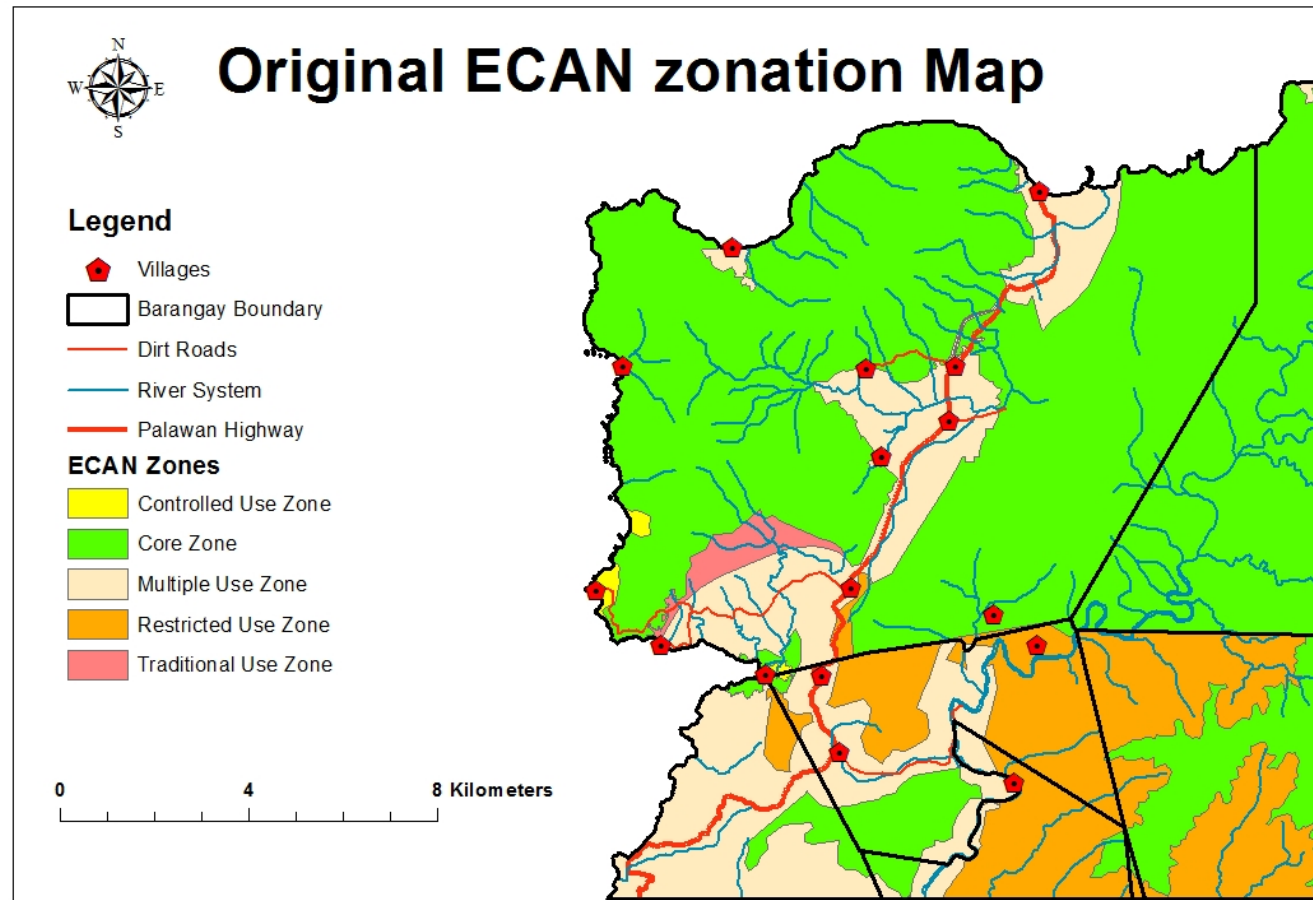

13) Can we weigh one of your charcoal sacks?

14) How many trees are necessary for 1 charcoal sack?

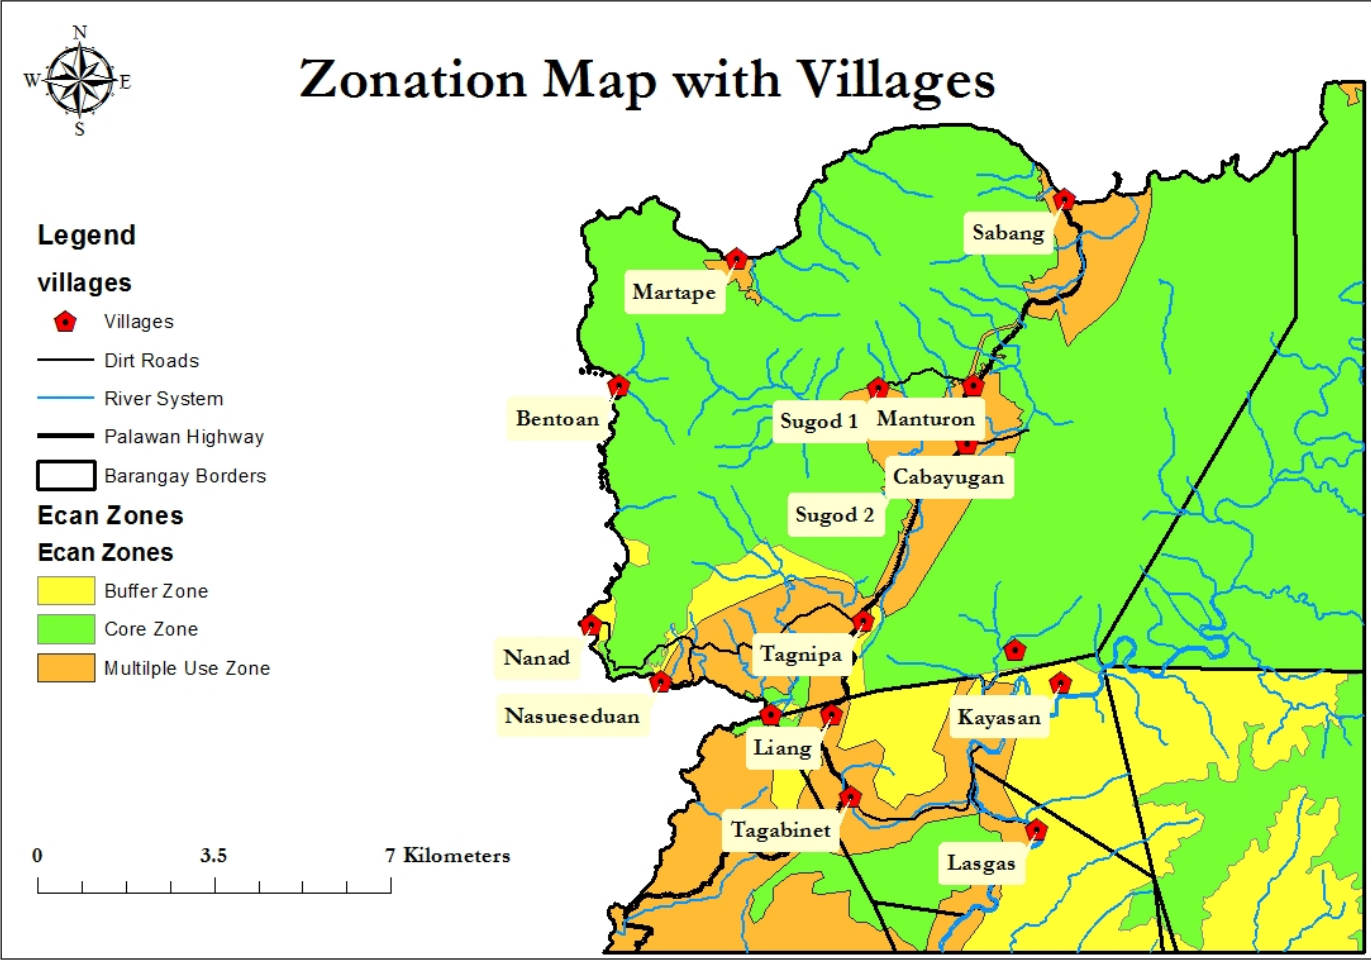

Appendix D: Field Form Burning Sites
